

“The office here keeps a busy school running, responding to all sorts of requests from parents and teachers. The new scan to SIMS system from Brother is a great help as it makes a previously laborious process quick and easy, allowing me to focus on more pressing priorities.

“Previously, whenever I needed to find a particular document in a child’s record, I’d need to physically go through the files, which could take several minutes. Now I can pull up all the information I need with a simple computer search. Not only does this save time, but the improved indexing of records makes it much easier to build up a picture of how each child is doing.”

Jane Walker, office administrator at St Paul’s C. of E. Primary

Brother helps St Paul's C. of E. Primary improve student record keeping

The school office at St Paul's C. of E. Primary in Chessington, Greater London processes hundreds of medical, consent and planned absence forms each month.

They use a School Information Management System (SIMS) to improve the way pupils' records are stored and to make the information easier to access. But uploading documents manually can be a time-consuming and error-prone process, so Brother supplied an integrated Direct Scan for SIMS solution to make it simple.

The benefits:

- ✓ Direct Scan for SIMS from Brother makes uploading records to the system quick, easy and reliable thanks to user-friendly 'personal filing assistant' interface
- ✓ Touchscreen control works alongside desktop application to automate as much of the upload process as possible, allowing well-organised digital records with minimal time commitment
- ✓ Children's records are now quicker and easier to view, reference and access, as well as more secure
